MULTIFUNCTIONAL COOLING STAND

User manual

1. Product introduction:

This product is a new type of intelligent multifunctional base, which can cool the PS5 console and charge the PS5 controllers at the same time. It can work normally by using the special charging cable configured in this product to get power from the USB port of the PS5 console. It does not need to buy other power supply separately. It has practical functions and is more convenient to use.

2. Product function diagram:

3. Function Description:

1. This product is compatible with CFI-1000A, CFI-1000B PS5 console. The power input port is type-C port, equipped with a special charging cable, connected to the PS5 console USB output port for power supply, no need to buy another power adapter.
2. Cooling fan: There are three high-speed fans behind the base, which can speed up the internal air circulation of the console to achieve the purpose of heat dissipation.
3. Fans Modes Switch: The fan can be turned on and off, and the wind force can be adjusted. Each time you press the switch, you can switch the working state of the fan, namely: fast mode -> medium speed mode -> slow mode -> off (such cycle);
4. 3 fans' Modes indicators: The "red / orange / green" indicator lights are used to indicate the "fast / medium / slow" wind speed of the fan, and the indicator light goes out after it is turned off.
5. Controller charging function: Two original PS5 controllers can be charged at the same time. According to the correct operation, put the controller into the left and right charging slot to charge.
6. When the heat sink is connected to the console, the left and right controller charging racks will emit blue ambient light.
7. The blue ambient light does not indicate the charge of the controller. The ambient light turns off after the base itself powers down. This product has a universal Type-C input port. Connect the Type-C port and the PS5 console's USB output port with the special USB charging cable included in packaging to provide normally power supply.
8. USB output port: This product has two USB output ports, the output ports "USB port 1" and "USB port 2" can output DC 5V power supply; the maximum output current of each USB output port is 1000mA when there is no controller charging . When both charging slots are charged with PS5 controller, the maximum output current of each USB port is about 700mA. (Note: The PS5 console may be overcurrent protection if the external load of the two USB ports exceeds 2A while charging with the PS5 controller.)

4. Instructions for use:

1. Place the product on a well ventilated platform, then place the PS5 console vertically, and screw the bottom screw for reinforcement.

2. Plug the "type-C plug" of charging cable included in packaging into the "type-C input port" of the base, and insert the two USB male heads into the two USB output ports of the PS5 console respectively, then all functions of the product can be used normally.

3. As shown in the image above, the PS5 controllers can be charged with Type C port by putting them in the left or right charging port in the front upside down mode.

4. When the PS5 controller is not connected to the console during charging, the orange breath light on the controller will emit orange light. When the breath light of the PS5 controller goes out, it means that the PS5 controller is fully charged. At this time, the game can be started when the controller is removed. **Note: When charging, the PS5 controller needs to disconnect the Bluetooth connection from the console to display the breath light. If the controller is connected to Bluetooth or in the game, it will not display the orange breath light.**

5. Note: when the charging power of PS5 controller reaches more than 80%, if the ccontroller is pulled out and inserted for charging at this time, the controller may not be charged due to the battery protection function of the controller; it will continue to charge until the battery power of the controller is less than 80%.

5. Product specification:

1. Input: DC 5V/3A (Power supply with special charging cable included in package)
2. Controller charging output: DC 5.1 V 600 mA x 2
3. USB1/USB2 Output: DC 5 V 700 mA~1000 mA x 2
(the maximum output of each USB port is 1000 Ma when there is no controller charging, and the maximum output of each USB port is 700 Ma when both PS5 controllers are charging)
4. Maximum speed of fan: fast speed: 5500 ± 1100 rpm;
medium speed: 4500 ± 900 rpm; slow speed: 3500 ± 700 rpm, with three internal cooling fans;
5. Charging time: the full charge time of the controller is about 4 ~ 4.5 hours
6. Product dimensions: 246 x 194 x 40 mm.
7. Material: ABS.
8. Accessories: 1 USB to type-C charging cable, 1 pcs fixing screw for PS5 console
(if there is any increase or decrease of accessories, this manual does not give another notice).

Note: for the above parameters, our company reserves the right to change the design or specification without prior notice.

6. Product precautions:

- Please place the product on the platform and in a well ventilated place.
- In order to ensure the normal operation of the product, please use the special charging cable to connect the PS5 console.
- This product is a ventilation and heat dissipation product, so when using this product, do not block the vent on any side.
- Don't insert anything from the cooling hole (especially metal parts), which will short-circuit the circuit in the fan base and cause damage to the product.
- When cleaning this product, please use dry cloth to wipe. Do not use water or alcohol to wipe this product, so that water or alcohol will flow into the product along the cooling hole, causing the product short circuit and damage.
- When cleaning the product, please disconnect the product from the console or input power supply.
- When the product is not used for a long time, please unplug the peripherals of the ports connected to the product and the input plugs.
- It is forbidden to store or use this product in humid or high temperature environment.
- If the product is wet, soaked or damaged, please stop using it and send it to the professional maintenance department for repair. Do not disassemble it without authorization.
- Keep the cooling base away from children.

All White Shark products are examined and tested after each stage of the production process and have all the required certificates (EMC, CE...). The products are subject to the following warranty conditions: • The warranty period for White Shark products is 36 months (on batteries 6 months) and begins on the day of being sold in the store • The warranty can only be claimed upon presentation of the original purchase invoice and a filed warranty paper with a stamp from the store it was bought at, and if the product has original packaging and all components and equipment • All malfunctioning of the product resulting from factory defects, that occur during the warranty period, and in the normal use of the product in compliance with all instructions will be removed. This warranty covers only defects in material and production. • If the product malfunctions during the warranty period, your White Shark distributor will give you the product (after which is checked by a professional) repaired or replaced • If the repair at the authorized service center is not completed within 30 days of being received at the service center, we will replace the product with a new one. If the repair during the warranty period lasts longer than 15 days, the warranty period is extended by as many days as the repair lasted. • If the device needs to be repaired within the warranty period, contact the store where you bought the product. If the product has to be sent to an authorized service center or general distributor, please send the product (with all parts and accessories) in the original packaging and with all the necessary documents (invoice, warranty card, etc.). The product can be repaired only in the authorized service center of the importer. The costs of shipping the product to the service center are funded by the customer. Possible damage to the product that can occur during transport is at the expense and risk of the buyer. Sending the product from the service center to the customer is funded by the service technician/the importer. This warranty does NOT cover: • Damage or malfunctions that would occur as a result of incorrect connection, incorrect polarization, incorrect battery placement, etc. • Defects caused by improper handling of products, use of parts or equipment that is not prescribed by our specifications, unauthorized product modification, and defects mechanical damage to the product • Defects that can occur due to product fall, use of force, natural disasters (flood, fire, thunder, earthquake...), due to battery leakage, due to unstable 220V voltage, frequent variations and/or power outages, etc. • Damage caused during transport to the customer • Products that have been opened or repaired by an unauthorized person • Parts that are considered consumables such as batteries, etc.

Svi White Shark proizvodi su provjereni i testirani nakon svake faze proizvodnog procesa te imaju sve potrebne certifikate (EMC, CE...) te podliježu sljedećim jamstvenim uvjetima: • Jamstveni rok na White Shark proizvode je 36 mjeseci (na baterije 6 m.) i počinje teći danom prodaje u trgovini • Jamstvo se može ostvariti samo uz predložene originalnog računa o kupnji i uredno popunjenog jamstvenog lista • sa žigom trgovine, te ako proizvod ima originalnu ambalažu i sve sastavne dijelove i opremu. • Svi nedostaci i kvarovi koji su posljedica tvorničkih grešaka i koji su nastali u jamstvenom roku i pri normalnoj uporabi proizvoda i pri poštivanju svih naputaka će biti otklonjeni. Ovo jamstvo obuhvaća samo greške nastale u materijalu i izradi. • Ako se proizvod pokvari tijekom jamstvenog roka, Vaš White Shark distributer će Vam proizvod popraviti ili zamijeniti nakon što ga provjeri stručna osoba • Ako popravak u ovlaštenom servisu nije izvršen u roku 30 dana od primitka u servis, proizvod ćemo zamijeniti novim. U slučaju da popravak u jamstvenom roku traje duže od 15 dana, jamstveni rok se produžuje od onoliko dana koliko je popravak trajao. • Ako se ukaže potreba popravka uređaja u jamstvenom roku, kontaktirajte trgovinu u kojoj ste proizvod i kupili. Ako proizvod treba poslati ovlaštenom servisu ili generalnom distributeru, molimo Vas da kompletan proizvod (sa svim dijelovima i opremom) bude zapakiran u originalnu ambalažu te da priložite sve potrebne dokumente (račun i ovjereni jamstveni list). Popravak aparata vrši se isključivo u ovlaštenom servisu uvoznika. Troškove prijevoza proizvoda na servis snosi kupac. Kupac preuzima rizik za moguća oštećenja tijekom prijevoza. Slanje proizvoda od servisa do kupca snosi servis tj. uvoznik. Ovo jamstvo NE obuhvaća: • Oštećenja ili kvarove koji su nastali kao posljedica nepravilnog priključivanja, krive polarizacije, pogrešnog stavljanja baterija i sl. • Kvarove nastale zbog nepravilnog rukovanja proizvodom, korištenja dijelova ili opreme koja nije propisana našim specifikacijama, neovlaštenog modificiranja proizvoda te kvarove nastale mehaničkim oštećenjem proizvoda • Kvarove koji mogu nastati uslijed pada proizvoda, uporabe sila, više sile tj. elementarnih nepogoda (poplava, požar, grom, potres...), uslijed curenja baterije, uslijed nestabilnog 220V napona, čestih varijacija i/ili nestanka struje i sl. • Oštećenja nastala pri prijevozu do kupca • Proizvod koji je otvoren i/ili popravljen od strane neovlaštene osobe • Dijelove koji se smatraju potrošnicima kao što su baterije i sl.
