5. Take off smartphone

Touch the on/off button on the left side, the clips will automatically open and you can take your phone out.

Notes

1. Do not disassemble or throw into fire or water, to avoid causing a short circuit.
2. Do not use wireless charger in severely hot, humid or corrosive environments.
3. Do not place too close to objects with magnetic stripe or chip (ID card, bank cards etc.) to avoid demagnetization.
4. Please keep a distance at least of 20 cm between implantable medical devices (pacemakers, implantable devices etc.) and the wireless charger, to avoid potential interference.
5. This product is not a toy, please keep it away from children to avoid unnecessary accidents.

The images from this manual are sketch maps, used for illustrating the instructions. The packet includes: wireless charger, power cable, user's manual.

Disposal and recycling information

The crossed-out wheeled-bin symbol on your product, battery, literature or packaging reminds you that all electronic products and batteries must be taken to separate waste collection points at the end of their working lives; they must not be disposed of in the normal waste stream with household garbage. It is the responsibility of the user to dispose of the equipment using a designated collection point or service for separate recycling of waste electrical and electronic equipment (WEEE) and batteries according to local laws. Proper collection and recycling of your equipment helps ensure EEE waste is recycled in a manner that conserves valuable materials and protects human health and the environment, improper handling, accidental breakage, damage, and/or improper recycling at the end of its life may be harmful for health and environment.
